**NEWS RELEASE  
February 13, 2008  
TRENCHING PERMITS IN PLACE**

Sego Resources reports that the company has received a permit to begin a trenching program. The permit allows 3200 metres of excavator trenching on the company's Miner Mountain Project.

The Miner Mountain Project is a Porphyry Copper Gold Palladium Project near Princeton, BC in the Traditional Territory of the Upper Similkameen Indian Band. Sego has an MOU with the Upper Similkameen Band. The Miner Mountain property is 2400 hectares in size. Due to limited snowfall and low elevation this property is accessible for work year round. Sego Resources has funding in place for a one million dollar exploration program in 2008. (Note News Release dated January 2, 2008)
